495NM FIBER-COUPLED LASER DIODE

This Fabry-Perot laser is offered in a fiber-coupled coaxial package. This laser is coupled to 3 μm polarization-maintaining fiber, NA 0.12, and terminated with an FC/APC connector. Other fiber and connector options are available; inquire for options and details.

These high stability fiber coupled laser diodes are designed and manufactured to meet the most demanding R&D and industrial applications. Proprietary design, packaging, and fiber coupling processes produce laser diodes with very high stability and low noise. Each laser diode is subject to extensive testing and burn-in before shipment to ensure the highest possible levels of quality and long term reliability.
